Civil & Environmental Consultants, Inc.

**Gannett Fleming**

 **MCKIM&CREED**  
ENGINEERS SURVEYORS PLANNERS

## KEYNOTE SPEAKER

# BETH DUTTON

### **Clean Rivers Spotlight: The Pittsburgh Journey**

Pittsburgh has heeded the urgent need to clean up its rivers over the past several decades and has made tremendous progress. However, in the face of the challenges of deteriorating water infrastructure and less and less funding to improve it, along with the intense storms of recent years, we need to work collaboratively and think creatively as never before in order to preserve and protect our “Three Rivers.”

#### **About**

Beth Dutton recently came onboard as the Senior Group Manager, Stormwater at the Pittsburgh Water and Sewer Authority, where she is leading PWSA’s newest engineering department. The Stormwater Group plans, designs, monitors, and maintains stormwater-related projects to help reduce local flooding and combined sewer overflows and improve the water quality and health of streams and waterways.

She has collaborated with many Pittsburgh-area stormwater professionals over the years in her positions at engineering consulting firms and at the environmental non-profit 3 Rivers Wet Weather. She knows the value of strong partnerships and persistence to help solve our region’s multi-faceted water quality challenges of flooding, polluted stormwater, and sewer overflows.

Beth is the Vice Chair of the Stormwater Committee of the Pennsylvania Water Environment Association. She has a Biology Degree from the University of Vermont, and a Master’s Degree in Public Health from the University of Pittsburgh.
