All Sections, Branches, Younger Member Forums, Student Chapters, Faculty Advisors and Practitioner Advisors are strongly encouraged to attend the 2017 Region 2 Assembly which is scheduled for Saturday, *November 4, 2017* in Pittsburgh, Pennsylvania at the University of Pittsburgh.

There will be professional development opportunities through presentations on current engineering design practices, a chance for interaction between students, professors and practitioners and the opportunity to learn more about what ASCE can do for you.

Please plan on sending a representative or a few emerging leaders from your Section to the Assembly. We encourage the Sections to mentor new leadership from Younger Member Groups and Student Chapters at this event.
