VOLUNTEERS ARE NEEDED TO HELP INTRODUCE HIGH SCHOOL STUDENTS IN THE ACE MENTORING PROGRAM TO TRANSPORTATION/TRAFFIC ENGINEERING.

The Transportation session will focus on designing appropriate intersections, including signals, signage, and pavement markings, for a commercial square at an introductory level. Volunteers will advise students and answer any project related questions. All instructions will be clearly provided; an expertise in traffic design is not required to volunteer.

WHEN: Wednesday, November 14, 2012 3:45 – 6:00pm
Student arrive at 4:00

WHERE: ESWP, 337 Fourth Ave. Pittsburgh

About ACE Mentoring:

The ACE Mentoring Program is for high school students interested in **A**rchitecture, **C**onstruction, and **E**ngineering. Students are split into teams to work on a year long project modeled after a current engineering/construction project in their area. This year's students are designing a commercial square, similar to Market Square in Downtown Pittsburgh. Every two weeks the students meet with professionals from different ACE disciplines to learn about their field and move the project forward.

If you're interested in volunteering please contact Linda Kaplan at lkaplan@gfnet.com by November 7, 2012.
